

WE WANT TO HEAR FROM YOU!

Nassau County is committed to improving transportation options for residents, workers, students, and visitors. Over the next year, the County will be developing a **Shared Mobility Management Plan** (e.g., flexible/on-demand transit, bike share, scooter share, ride hail, etc.) to identify opportunities for new and enhanced transportation services, including options to complement/extend existing transit services.

The plan will further Nassau County's goals to promote social equity, environmental sustainability, and economic development. Your response to this survey is important to help identify your transportation needs and preferences.

Nassau County Department of Public Works – Planning Division
